

M01 Terrain and sampling design

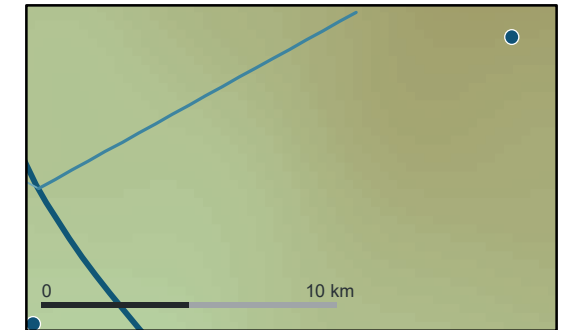

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

Quiet relief, visible samples and a separate detail scale.

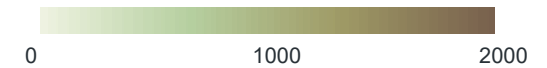

a Synthetic catchment

b Detail

Elevation (m)

● Type A

■ Type B

◆ Type C

Invented terrain and stations.

Box marks the detail view.

Detail has its own scale.

Design sources: A09, A15, A16, A17, A23, A24, A28 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

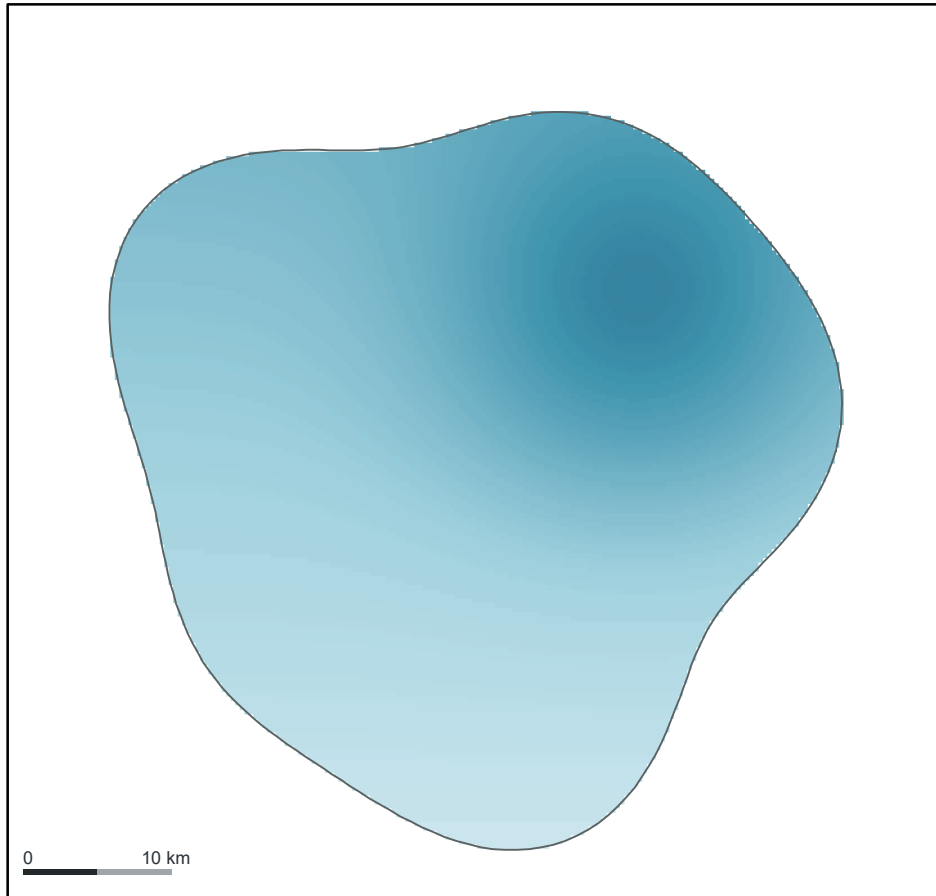

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.

M02 Comparable continuous fields

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

Shared extent, shared limits, shared units; scenario labels remain explicit.

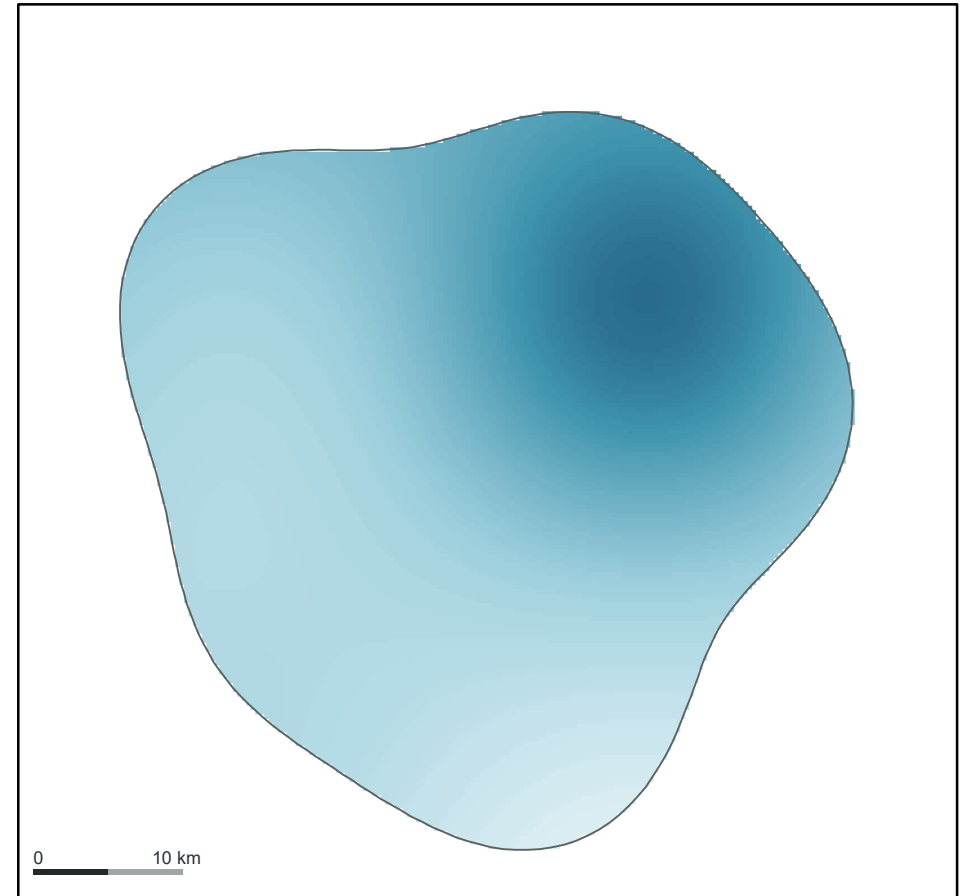

a Scenario A

Illustrative precipitation (mm)

0 750 1500

b Scenario B

Illustrative precipitation (mm)

0 750 1500

Design sources: A02, A10, A11, A26 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

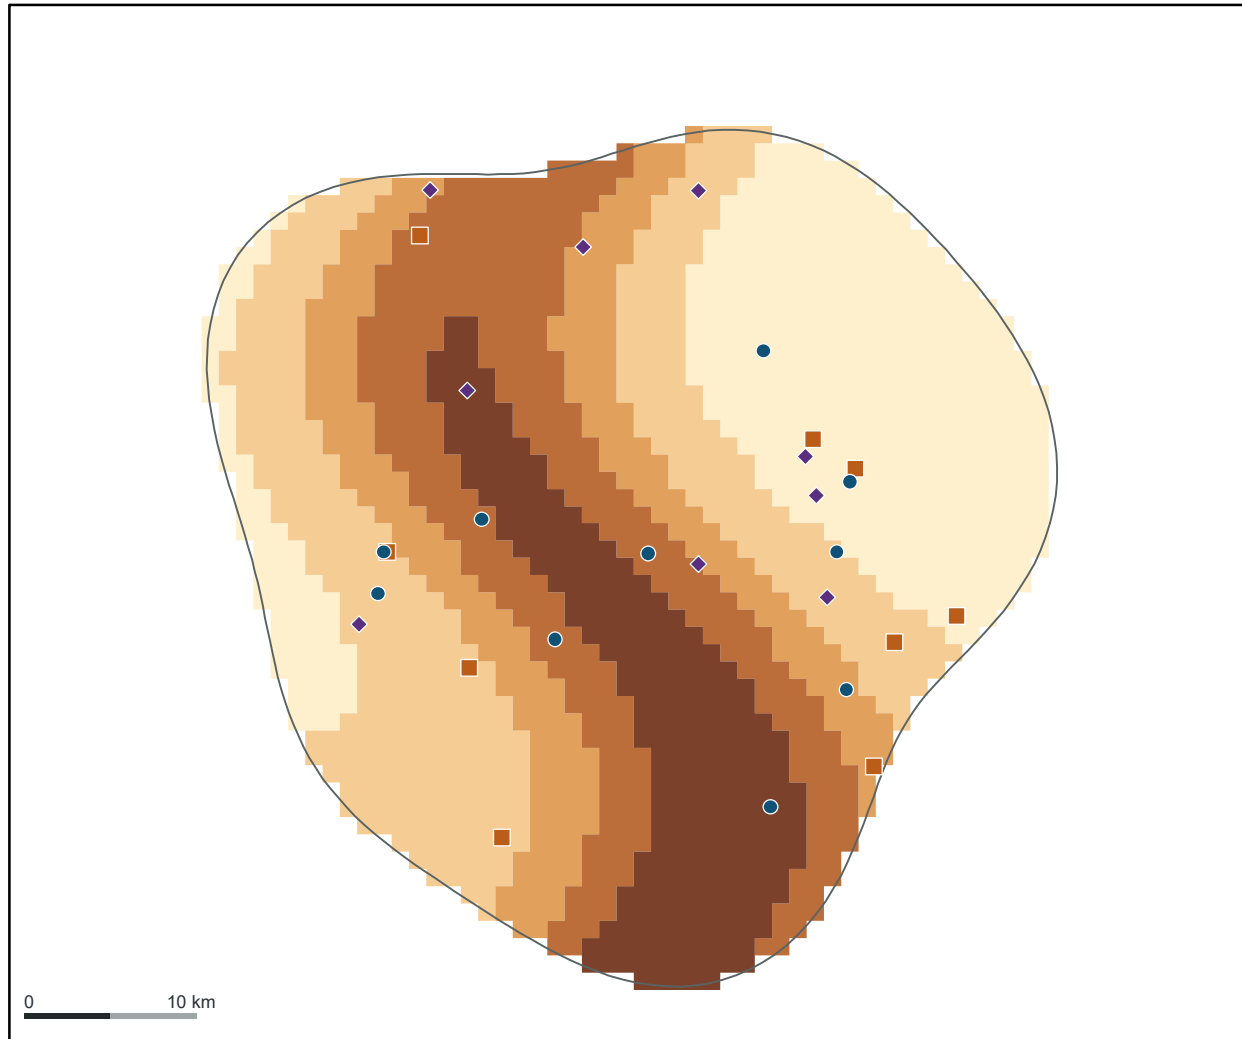

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.

M03 Ordered susceptibility classes

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

Fixed numerical breaks and independent point symbols.

Susceptibility index (dimensionless)

[0.0, 0.2)
[0.2, 0.4)
[0.4, 0.6)
[0.6, 0.8)
[0.8, 1.0]

● Type A
■ Type B
◆ Type C

Fixed 0.2-wide intervals.
This index is not calibrated
event probability or risk.

Design sources: A01, A13, A19, A22, A25 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

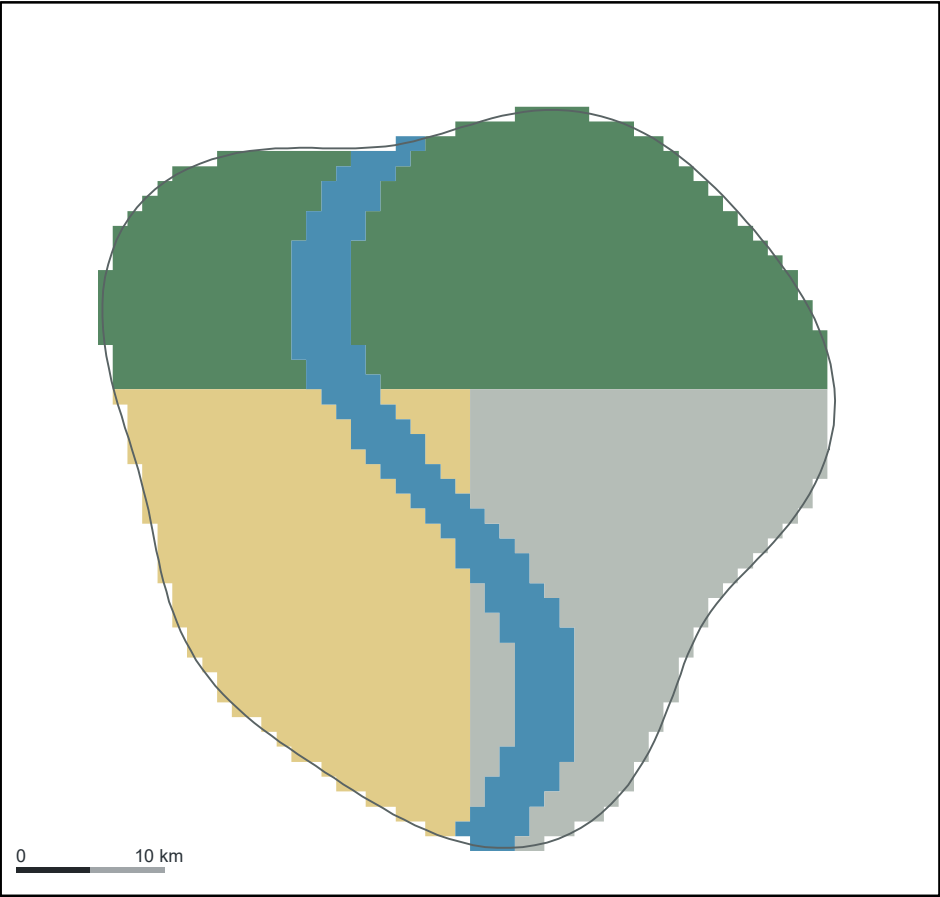

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.

M04 Land-cover comparison

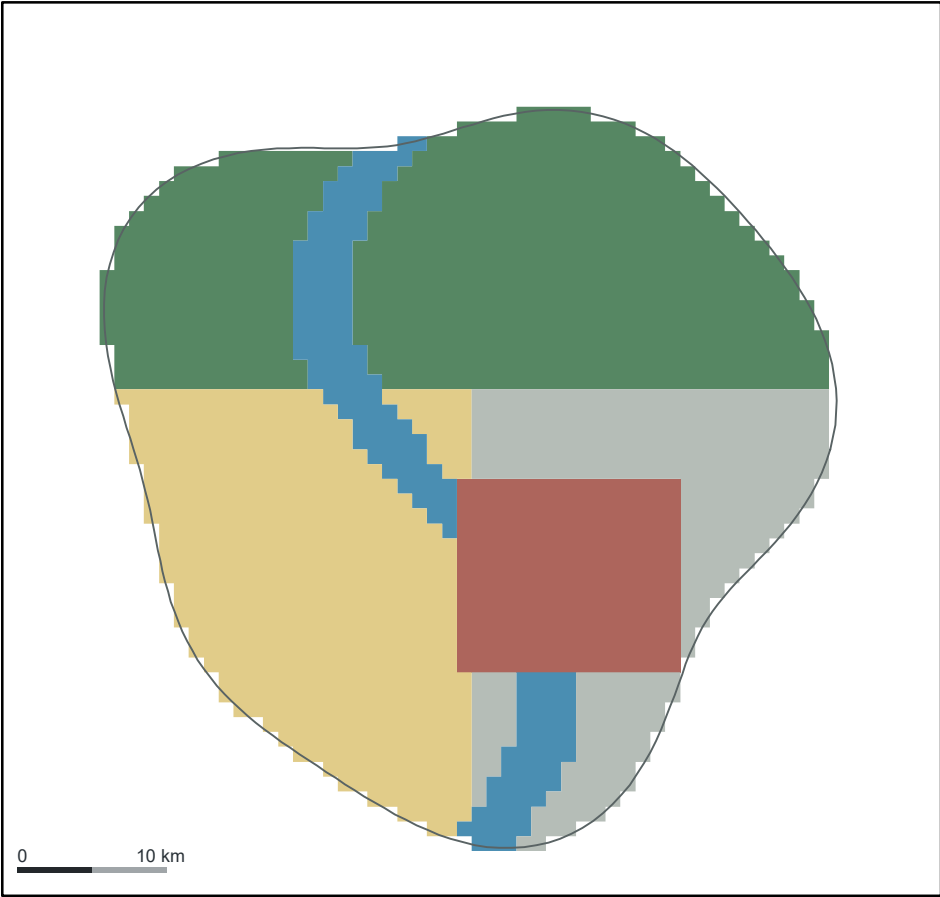

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

Stable class colors across scenarios; nominal classes have no numeric gradient.

a Scenario A

b Scenario B

Water Woodland Cropland
Open ground Built area

Design sources: A06, A18 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

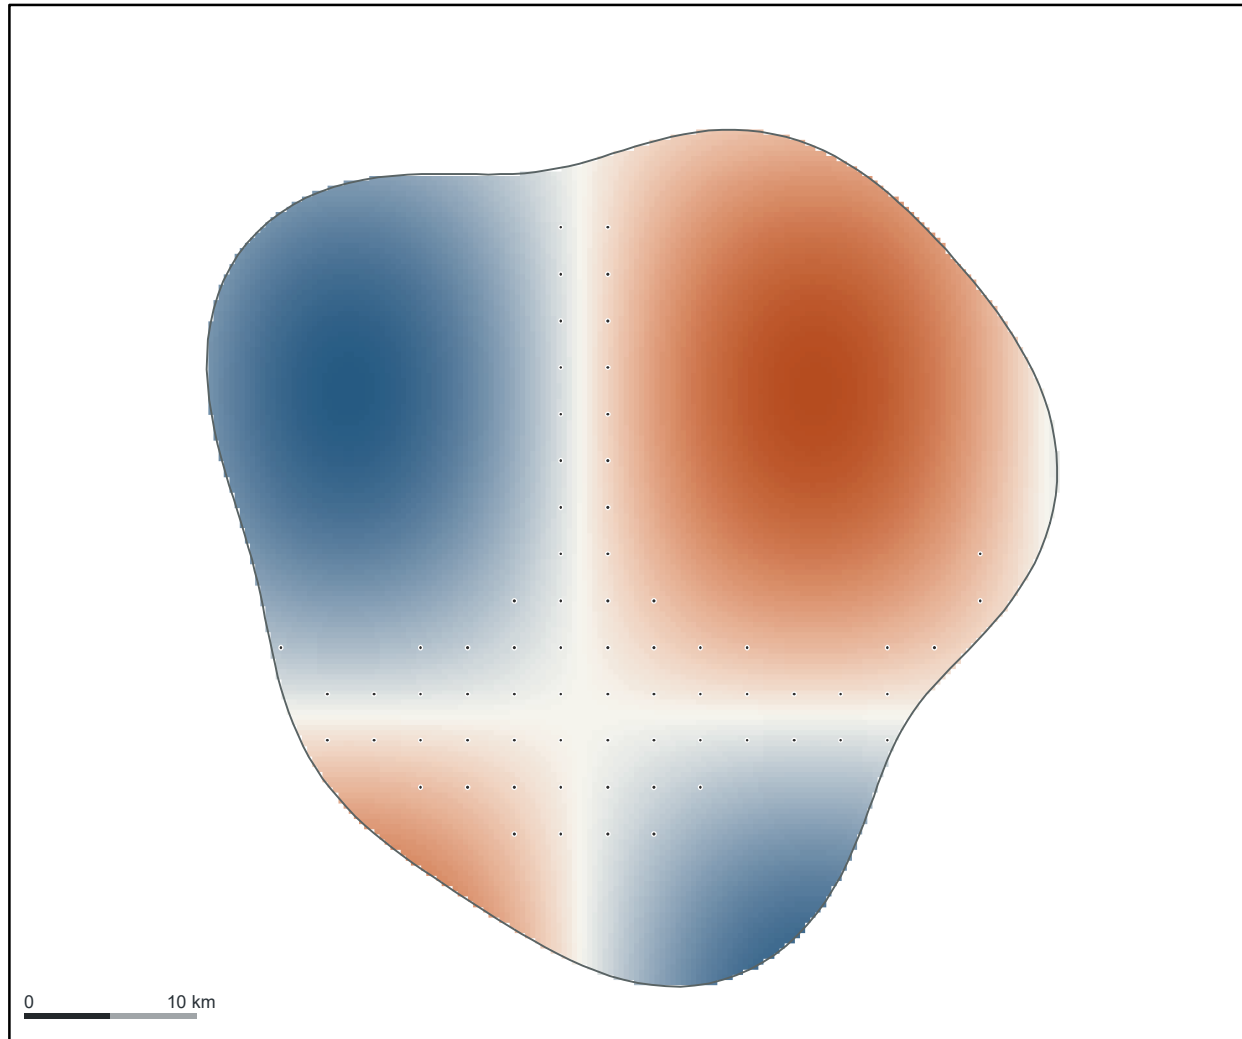

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.

M05 Signed change and uncertainty

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

A zero-centred diverging scale; sparse dots carry a second meaning.

Illustrative change

Dots: illustrative uncertainty
mask, not significance tests.
Zero has a neutral light color.
Negative and positive limits
are equal in magnitude.

Design sources: A03, A07, A30 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

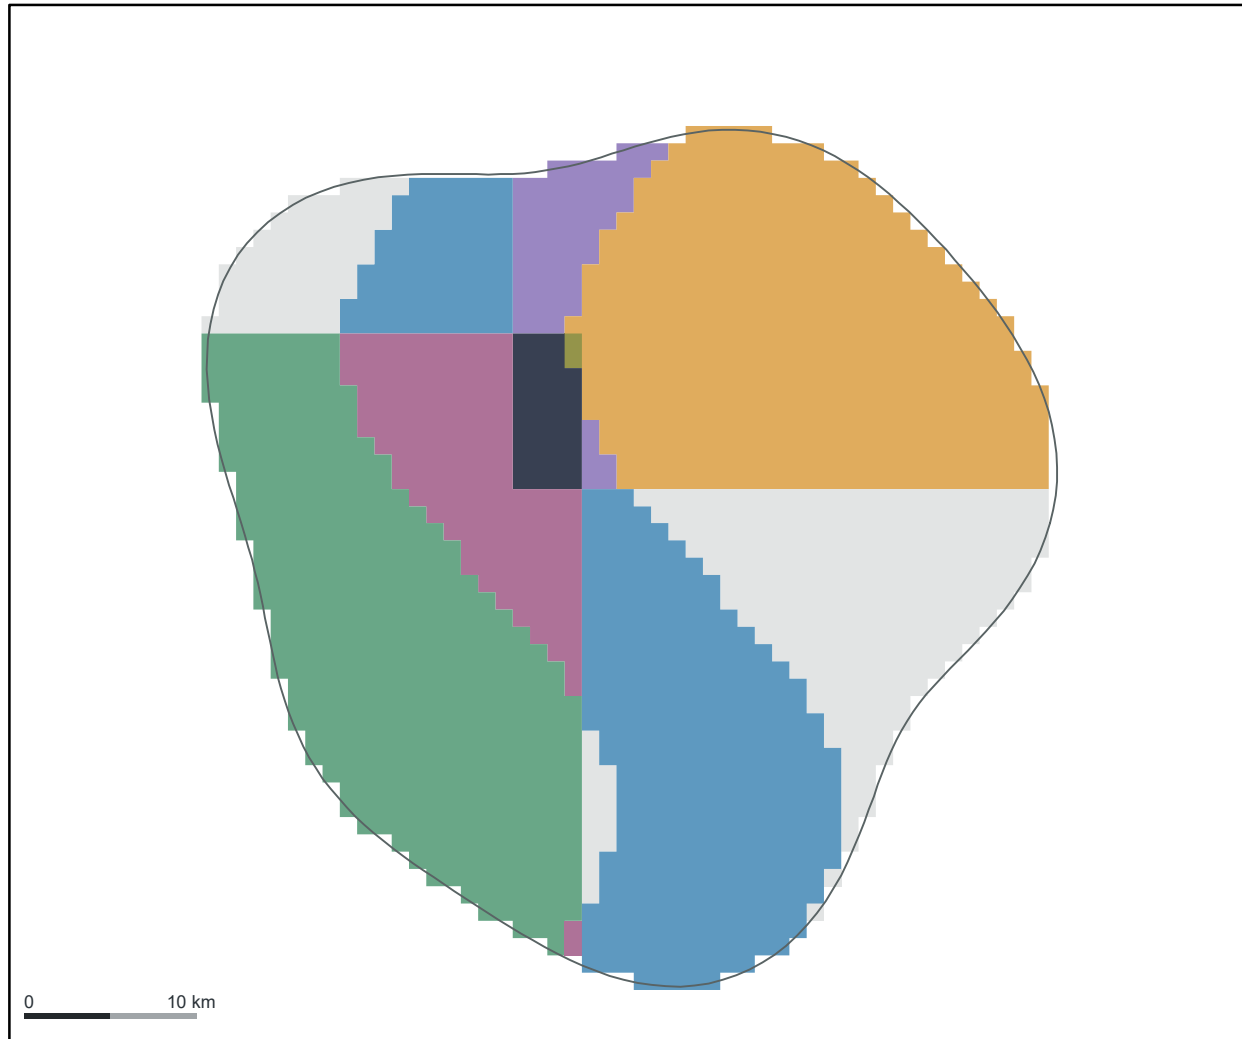

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.

M06 Multiple hazards as combinations

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

Separate combinations from ordered severity; retain all eight possible codes.

Illustrative hazard overlap

- None
- Flood
- Slide
- Flood + slide
- Erosion
- Flood + erosion
- Slide + erosion
- All three

Code = $F + 2 \cdot S + 4 \cdot E$.

F, S and E are binary masks.

Combination is not severity.

Design sources: A21 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

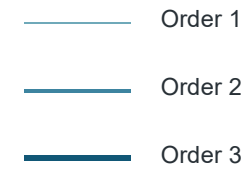

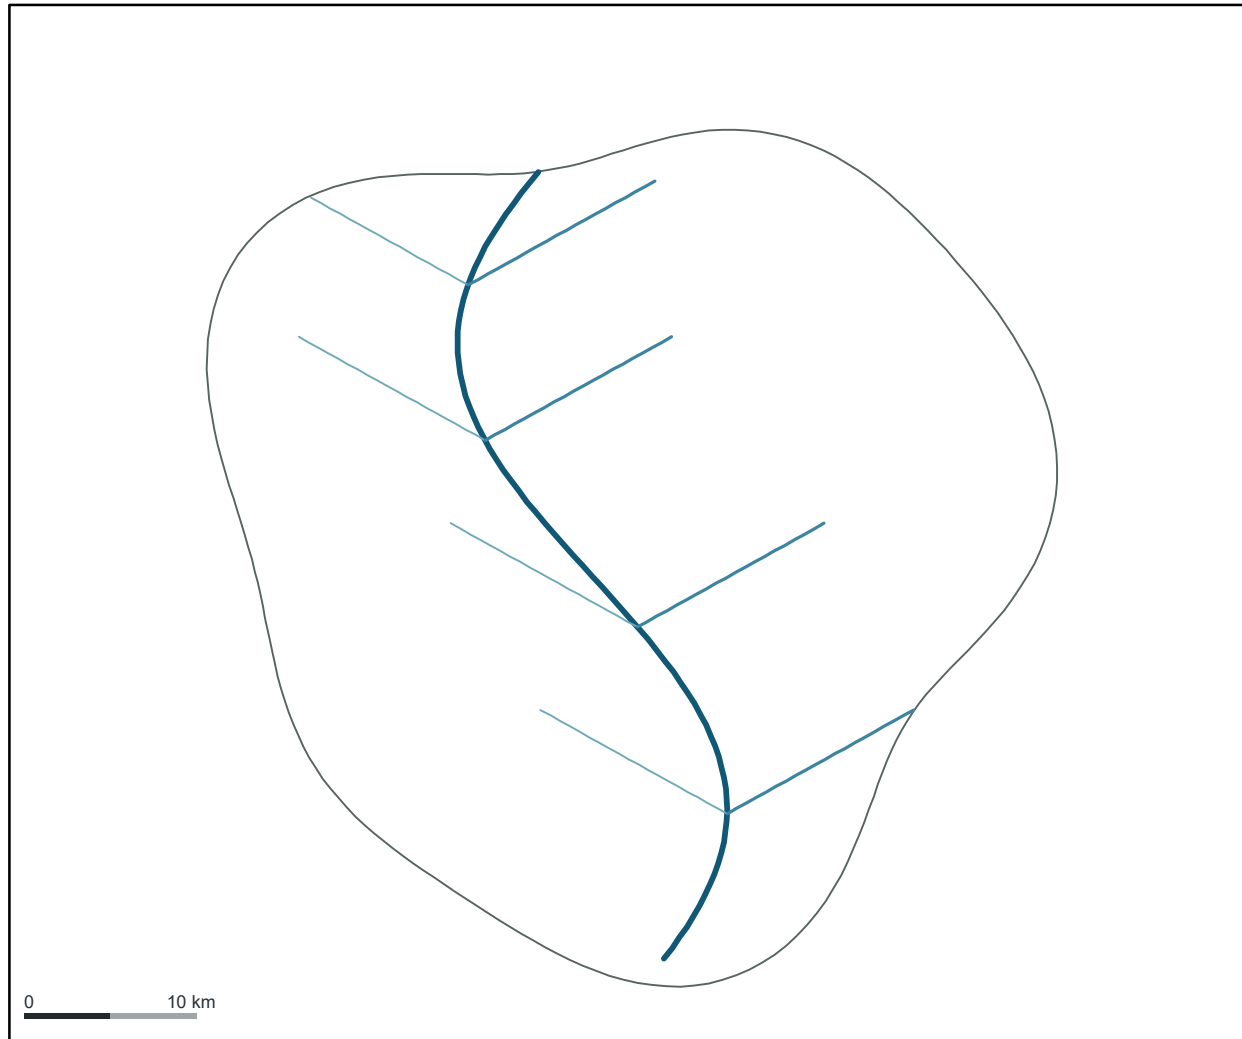

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.

M07 River network hierarchy

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

Line width represents stream class; color reinforces the same order.

Synthetic channel network

Order 1: 0.6 pt
Order 2: 1.2 pt
Order 3: 2.1 pt
Schematic network; no claim
of a hydrologic extraction.

Design sources: A08, A27 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

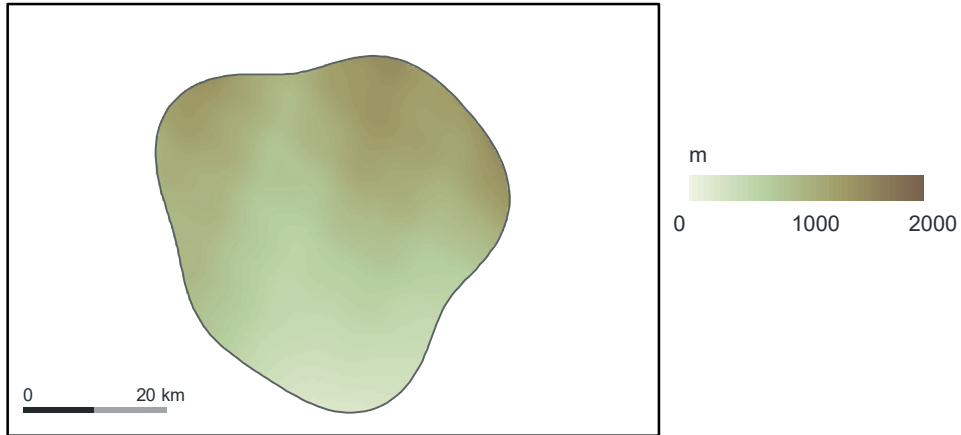

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.

M08 Mixed conditioning factors

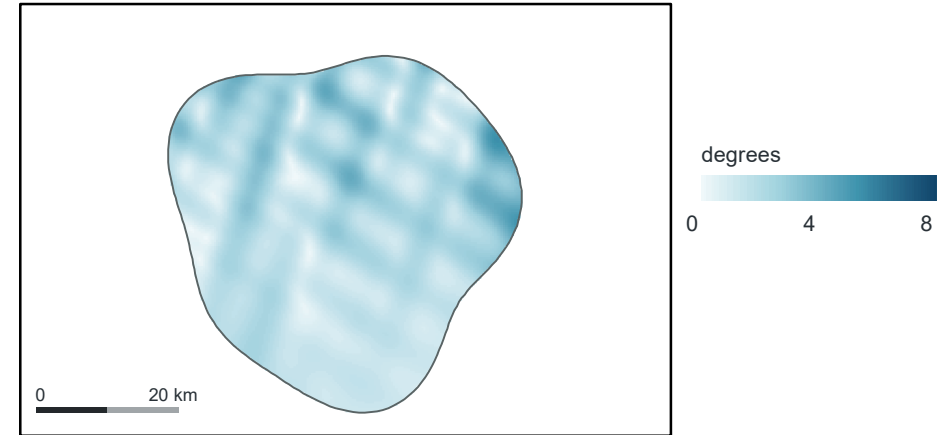

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

Comparable geography; independent legends for quantities with different units.

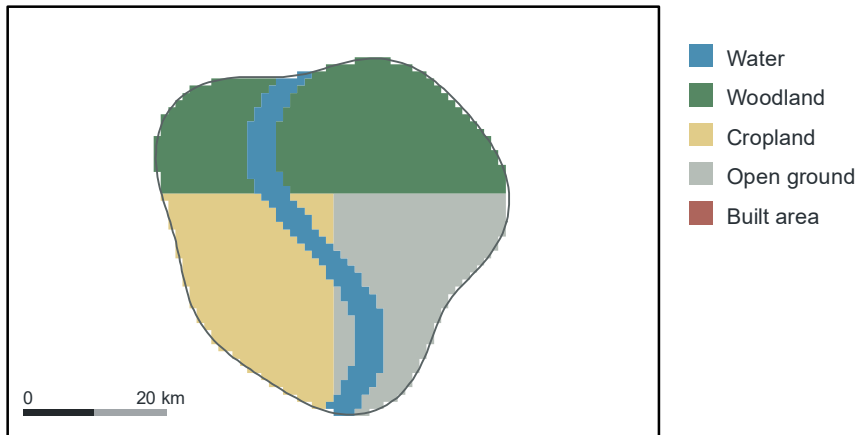

a Elevation

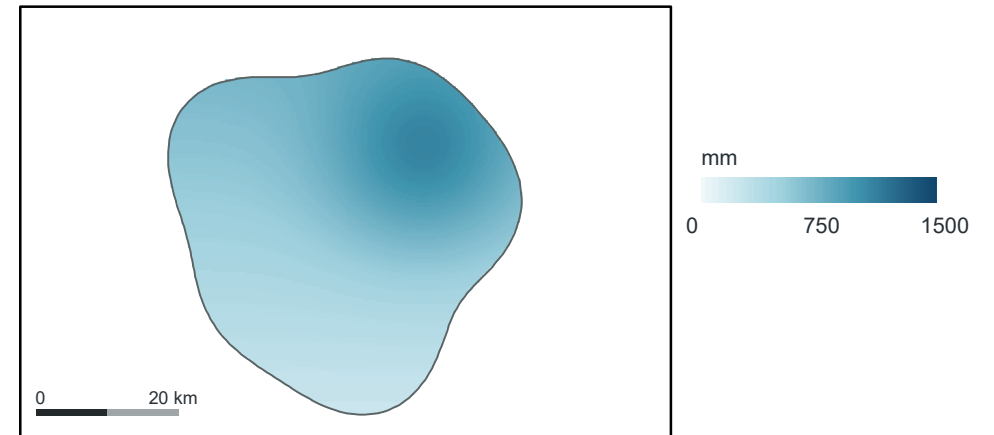

b Slope

c Cover

d Precipitation

Design sources: A20, A27, A29 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

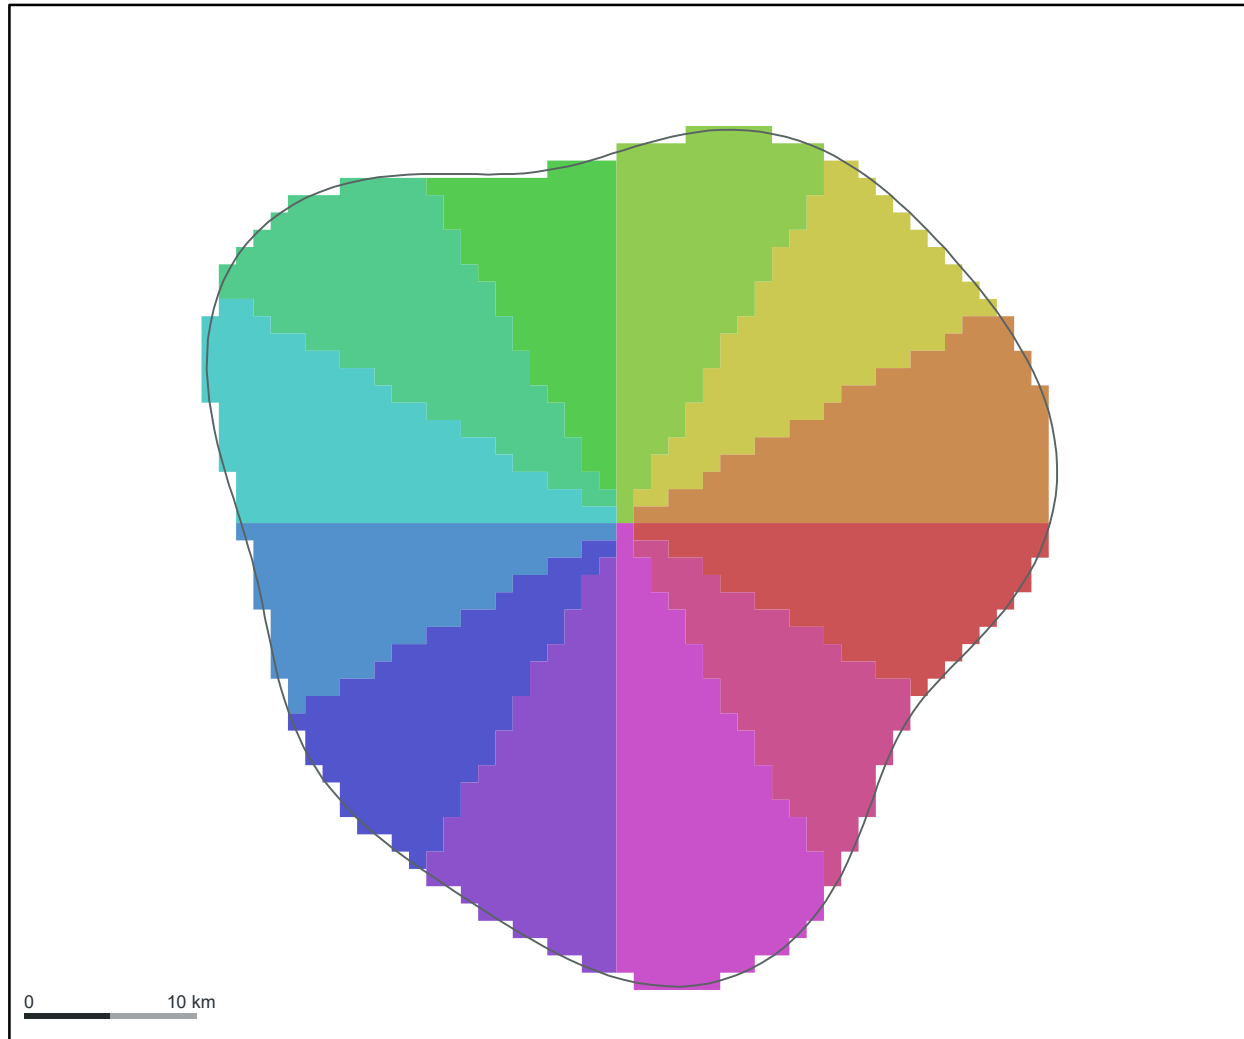

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.

M09 Cyclic seasonal timing

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

Month is a phase: December and January are neighbours, not extremes.

Illustrative peak month

- 01 Jan
- 02 Feb
- 03 Mar
- 04 Apr
- 05 May
- 06 Jun
- 07 Jul
- 08 Aug
- 09 Sep
- 10 Oct
- 11 Nov
- 12 Dec

Synthetic angular phase field.
No linear average of month IDs.

Design sources: A12 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

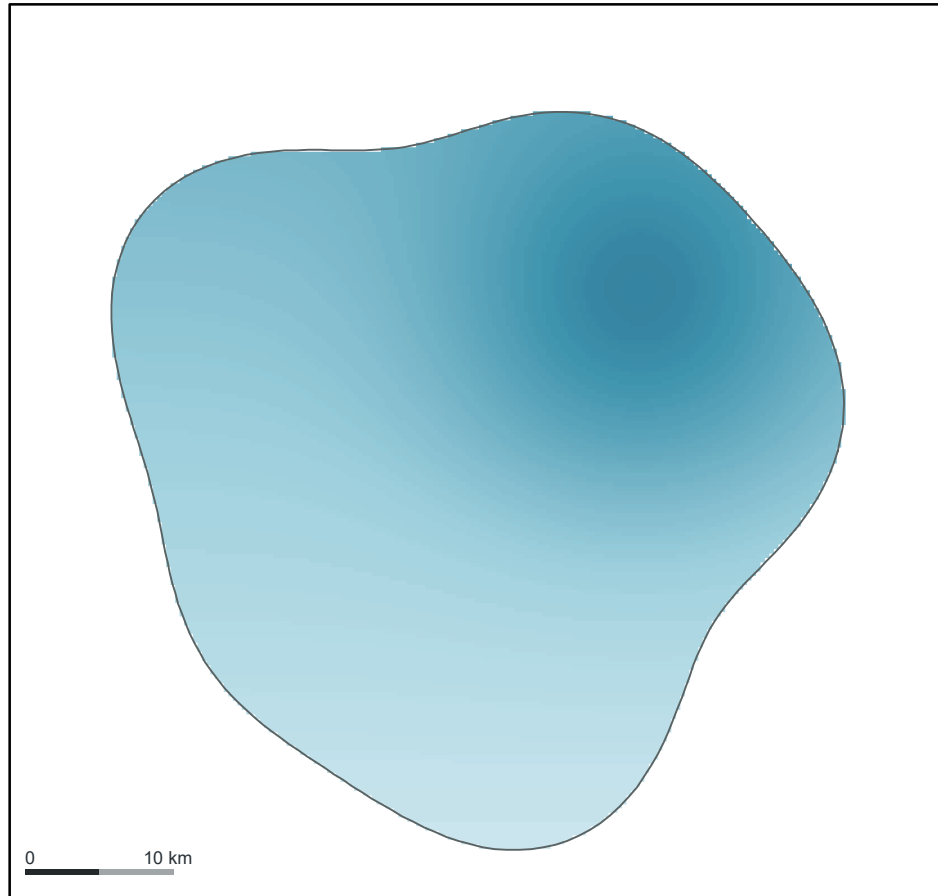

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.

M10 Spatial support and resolution

SYNTHETIC DESIGN RECONSTRUCTION | Not research results

Same physical field and color limits; coarser cells keep their support visible.

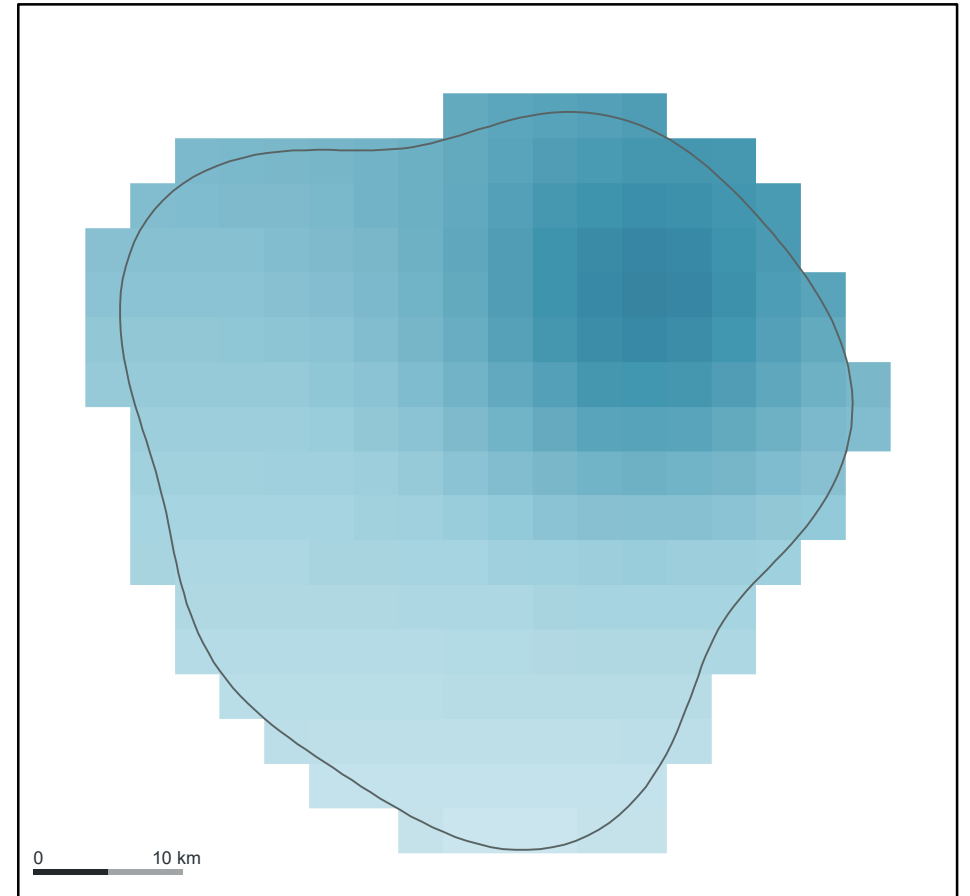

a 300 m synthetic cells

Illustrative precipitation (mm)

0 750 1500

b 3 km area means

Illustrative precipitation (mm)

0 750 1500

Design sources: A04, A05, A14 | See literature-30.md for figure-level evidence.

WGS 84 / UTM 50N (metres) | Grid north up | White outside domain = NoData

Native ArcMap 10.2; legends and scale graphics are editable but must be rebuilt after data/extent changes.
